

Christopher Aytona

Data and Reporting Analyst | Automation & Data Engineering

Toronto, ON, Canada (Open to US relocation / US remote) | (289) 200-6079 | christopher.aytona@gmail.com
linkedin.com/in/christopheraytona | github.com/aytona | aytona.github.io

Data and automation engineer building production-grade ETL pipelines, real-time monitoring systems, and AI-driven operational tools at enterprise scale. 8+ years of software engineering across startups, operations technology, and applied AI — including a published research paper on autonomous agent architecture. Open to relocation for the right opportunity.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, VBA, C#

Databases: Amazon Redshift, MySQL, DynamoDB

Frameworks: pandas, selenium, boto3, Flask, Playwright

Tools: QuickSight, Excel, Slack API, Git, AWS (Lambda, S3, CloudWatch, CDK, ECS Fargate, Bedrock), Unity Engine

Methods: Agile, Lean, Six Sigma principles, ETL design, CI/CD

PROFESSIONAL EXPERIENCE

Amazon

Sep 2021 – Present

Belleville & Ajax, ON

Data and Reporting Analyst (L4) — Sep 2023 – Present **Process Assistant (L3)** — Jan 2023 – Sep 2023

Fulfillment Associate (L1) — Sep 2021 – Jan 2023

- Architected 36+ automated ETL pipelines (Python, Redshift, Lambda) delivering 350+ scheduled outputs per week across 35+ sites and 800+ users
- Built real-time compliance monitoring system (17 scripts, 8 sites) that proactively alerts managers before labour law thresholds are breached — critical for 12hr/day and 60hr/week jurisdictions
- Designed cross-site Slack webhook platform (13 integrations, 6 FCs) providing automated backlog, safety rotation, and capacity alerts to regional leadership
- Created AI ticket triage system that cuts 36-hour SLA to under 1 hour for routine issues while surfacing miscategorized high-impact tickets
- Owned Quality KPI performance as site SME — supported #1 network ranking and sustained Top 5
- Designed inbound high-risk ASIN flagging system (IHRA) scoped across 32 AMXL FCs network-wide
- Built autonomous AI agent orchestration layer managing scheduled workflows, monitoring, and reporting with zero manual intervention
- Promoted L1→L3 within 16 months; managed shift operations for 30+ associates with cross-department coordination

CEO & Founder

Jun 2025 – Present

TapOrbit Studios — Toronto, ON Side Venture

- Founded and operate indie game studio — managing business operations, finances, team, and project timelines
- Shipped debut title *Zombie Citizen* to iOS and Android (2026)
- Step into Unity/C# development when needed to unblock technical work

Software Developer

Sep 2018 – Oct 2019

Treasured — Markham, ON

- R&D on VR/AR virtual world SaaS product (Oculus, Magic Leap); partnered with CTO on technical direction

Previous Engineering Roles (2014–2018)

Transhumanoid Productions — Game Developer, Team Lead (remote, worldwide distributed team)

Ruckus Games — Game Developer, Engineering Lead (Toronto)

Owned full development lifecycles, led distributed teams, built end-to-end game systems in Unity/C#

PUBLICATIONS

Aytona, C. (2026). SHARD: Self-Healing Autonomous Resilient Delegation — A Pattern Language for Persistent AI Agent Harnesses. Zenodo / SSRN (preprint). DOI: 10.5281/zenodo.20474819

EDUCATION

Bachelor of Computer Science — Ontario Tech University, 2021

Advanced Diploma in Game Programming — George Brown College, 2017 — Graduate with Honours | Dean's List
